BON'S DOUBLE EDGED BLUE KANGAROO COMBO SCREED NOW AVAILABLE AS A WALKING TOOL

(GIBSONIA, PA, USA) – Bon's popular Blue Kangaroo Combo Screed, manufactured with two distinctive working edges, is now equipped with a mounting plate which accepts a bracket for attaching a button handle. One edge of the combo screed is a sharp 90-degree corner and the other is a rounded corner. The Blue Kangaroo is the best manual screed for multiple trade applications. It can be used as a screed, as a float or as a checking rod.

The lightweight aluminum design of the Blue Kangaroo Combo Screed makes it easy to maneuver and easy to use for moving heavy loads. It is commonly used for concrete, hardscape and asphalt work. The screed is very durable and long lasting. It is fully reversible with a total of four working edges for extended wear.

Five lengths are available from 4-foot to 12-foot. The components are sold separately – Pick your screed size, add a bracket and add a handle.

About Bon Tool Co:
